

CHILDREN WITH DISABILITIES COMMUNITY SERVICES PROGRAM
(CDCSP)

You have received an application packet for the **Children with Disabilities Community Services Program**. This is a program which provides a medical card to children from birth through age 18 who would otherwise be denied a medical card due to their parent's income exceeding allowed limits. You may reference the CDCSP policy manual on the Bureau for Medical Services website at the following link:
[https://dhhr.wv.gov/bms/Provider/Documents/Manuals/bms-manual-Chapter 526 CDCSP%202015.pdf](https://dhhr.wv.gov/bms/Provider/Documents/Manuals/bms-manual-Chapter_526_CDCSP%202015.pdf)

*CDCSP 1: **Information Sheet**-To be completed by parent, guardian, legal representative or service coordinator.

*CDCSP-2A: **ICF/IID Level of Care Evaluation**-This is to be completed by the child's treating physician. **must be completed by a licensed physician** (MD or DO). This document must contain eligible diagnoses and the physician's certification that the individual requires an **ICF/IID Level of Care**.

*CDCSP-2B: **Acute Care Hospital/Nursing Facility Level of Care Evaluation**-This **must be completed by a licensed physician** (MD or DO) when **Nursing Level of Care** or **Acute Hospital Level of Care** is the level of care required. The physician must indicate which level of care he/she believes is appropriate.

*CDCSP-3: **Comprehensive Psychological Evaluation**-This is to be completed by a **licensed psychologist** using the format provided. (ICF/IID Level of Care only). For individuals who are on the IDD Waiver Wait List, the Independent Psychological Evaluation may be used for their first year of CDCSP eligibility.

*CDCSP-4: **Cost Estimate Worksheet**-This is to include all medical costs for 12 months prior to application. **Costs must be totaled**. This is to be completed by the parent, legal guardian, or legal representative. You may also submit private insurance Explanation of Benefits in place of completing the form but signature is still required.

***Social Security Denial Notice**: must apply for SSI benefits for your child and be dated within the last 12 months.

**Psychological Evaluation Template
CDCSP**

Evaluation Date

Please ensure the following sections are covered in the submitted psychological evaluation for CDCSP.	
Name of applicant	Service Coordination Agency (SCA)
Current location of applicant: <input type="checkbox"/> Residential <input type="checkbox"/> Home <input type="checkbox"/> Nursing Facility <input type="checkbox"/> Psychiatric Unit <input type="checkbox"/> Acute Hospital <input type="checkbox"/> Other: _____	
Reason for evaluation:	
Previous IPE I/DD <input type="checkbox"/> Yes <input type="checkbox"/> No If yes, Date of Evaluation: _____	
Demographics	
Date of Birth: <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/> Age: <input type="text"/> <input type="text"/> Gender <input type="checkbox"/> M <input type="checkbox"/> F Month Day Year	
Per documentation does the individual have a Legal Guardian? <input type="checkbox"/> Yes <input type="checkbox"/> No	
If yes complete the following:	
a. Contact Name	
Last	First
MI	
b. Contact Address	
c. Contact Phone Number <input type="text"/> <input type="text"/> <input type="text"/> - <input type="text"/> <input type="text"/> <input type="text"/> - <input type="text"/> <input type="text"/> <input type="text"/> <input type="text"/>	
d. Relationship: <input type="checkbox"/> Parent <input type="checkbox"/> Child <input type="checkbox"/> Sibling <input type="checkbox"/> Spouse <input type="checkbox"/> Friend Other: _____	
I. Relevant History:	
A. Developmental Hx: Infants and Toddlers: Will consist of a thorough descriptor of mother's pregnancy and delivery, health problems during infancy, review of developmental milestones, and services received.	
B. Medical Hx: Any medical conditions; medication and response to treatment, head injuries, seizure activity, hospitalizations.	
C. Mental Health Hx: Past evaluations, onset of diagnoses and response to treatment. Establishing a time line with records to support is critical.	
D. Results of previous Psychological Evaluations: The previous psychological evaluations can be summarized here and/or attached to the evaluation. You must supply this information so that a timeline of diagnoses can be established.	
II. Current Status:	
A. Physical/Sensory Deficits Summarize the individual's ability physically and with respect to vision, hearing, and sensory issues. Please note any corrective aids and therapies.	
B. Medications Please note current medications and reason for prescription.	
C. Current Behaviors (A narrative description of an individual's activities and abilities per guardian/informant report, behavioral observations, and information from additional sources. NOT a summary of ABAS-3 Scores	

--

<ol style="list-style-type: none"> 1. Self-care refers to such basic activities such as age appropriate grooming, dressing, toileting, feeding, bathing, and simple meal preparation. Focus on what is age appropriate for the individual. A 4 year old would not be expected to assist with food preparation, but should be able to drink from a cup. A 2 year old may or may not have toileting abilities. 2. Receptive or expressive language (communication) refers to the age appropriate ability to communicate by any means whether verbal, nonverbal/gestures, or with assistive devices. Note the onset of speech, if speech therapy was/is necessary, and the individual's ability to convey his/her needs. Articulation difficulties are not considered a language deficit. If other modes of communication are needed, please note this as well. Also include if the individual understands what is being stated, but not the compliance with said statements. 3. Functional Learning (age appropriate functional academics) For children, discuss the individual's school placement and any services they receive through the school system or in the community. Include the IEP and psychoeducational testing if appropriate. 4. Mobility (motor skills) refers to the age appropriate ability to move one's person from one place to another with or without mechanical aids. This refers to both gross motor skills and fine motor skills. Please note if the individual can ambulate, ascend and descend stairs, write, cut with scissors. Note if mechanical aids are needed. In the case of an infant or toddler, note head control, crawling, walking, grasping, self feeding. 5. Self-direction refers to the age appropriate ability to make choices and initiate activities, the ability to choose an active lifestyle or remain passive, and the ability to engage in or demonstrate an interest in preferred activities. This addresses an individual's ability to initiate activities and make choices, but does not address whether they are appropriate. Note the individual's daily activities, if he/she attempts to assert control over the environment, and if he/she makes choices with respect to food, activities, preferences, etc. 6. Capacity for independent living encompasses sub-components that are age appropriate for home living, socialization, leisure skills, community use, health and safety, and employment. Addressing each area of capacity is preferred. Note the individual's ability to utilize his/her community resources, choice of leisure skills, ability to socialize and have friends, activities in the home, awareness of health and safety, and if employed. Again, this will be very age dependent. A 4 year old is not expected to know how to cross the street, but could alert a caregiver if injured. 	
III. Mental Status Evaluation	
Please complete as thorough a mental status as possible given the verbal skills and capacity of the individual. In very young children, this may be behavioral observations only. Attempts should be made to secure as much information as possible.	
IV. Current Evaluation	
A. Intellectual/Cognitive: A full battery test of intellect should always be attempted. If one has been completed in the past 6 months and is believed to be accurate, a brief IQ test may be administered. In very young children who are unable to participate in IQ testing, a developmental inventory such as the DP-3 or ELAP may be administered as they measure cognitive abilities. If an adult is unable to complete in a full battery, a Slosson and PPVT can be administered. Please include all scores.
